

PARABOLIC ALUMINUM LOUVER

L30

NOMINAL 3" DEEP TO FIT ASSEMBLER'S HOUSINGS

Lumiflux™ 30 is a highly versatile nominal 3"/76,2mm parabolic aluminum louver that is suited to ceiling and luminaire applications. The precisely formed blades direct the light to the zones where it is most needed. Variable configurations and blade spacing offer the optimum light control for each installation. This large scale louver is available in sizes up to 63" (1600mm) square when flanged.

Stock parts are designed for specific fixture housings. These parts are available in a semi-specular anodized or high reflective white finish and also feature spring loaded latches for secure installation.

PART NUMBER:	NOMINAL SIZE	TOTAL NUMBER OF CELLS	NUMBER OF CELLS: WIDTH	NUMBER OF CELLS: LENGTH	CARTON QUANTITIES
