

PREMIUM 3/8" EGGCRATE

1/2" X 1/2" X 3/8" 14 x 14 x 9.5mm

SLP's Thincell™ T3 is an injection molded cube louver that offers traditional cell size, efficiency, and customer acceptance. Standard material is white styrene. T3 is molded as a 2' x 4' and is available in lesser nominal sizes. The nominal 3/8" (9,5mm) thickness offers an important freight advantage when cube and container capacity is an issue. All full size parts include a half lap perimeter detail that facilitates continuous row applications with an unbroken appearance.
