Chemical Resistance Terms and Conditions

Chemical resistance is a difficult area for any designer due to the fact that the resistance is dependent on so many different factors: concentration, mix of chemicals, humidity, air flow, etc. SLP provides components to many customers and we never know the conditions of the installation.

SLP does publish the material of which parts are made but must leave the suitability to others. We have asked our material suppliers on many occasions if our product will stand up to specific environments and their answer is always the same: It needs to be tested in the exact environment to know how the material will perform.

SLP warranties product to be free from manufacturing defects only.

SLP Lighting Makes No Representations Or Warranties Except As Expressly Set Forth In The Terms And Conditions, And SLP Lighting Expressly Disclaims All Other Representations And Warranties, Express Or Implied, Including Without Limitation Any Warranties Of Fitness For A Particular Application. No Customer Or Supplier Of SLP Lighting Has The Authority To Modify Or Amend This Limited Warranty.

In No Event Shall SLP Lighting Be Liable For Any Indirect, Special, Incidental, Consequential, Or Punitive Damages, Even If Informed Of The Possibility Of Such Damages, Whether As The Result Of Breach Of Contract, Warranty, Tort (Including Negligence, Strict Liability, Or Any Other Theory)
