

Citadel Update

September 2008

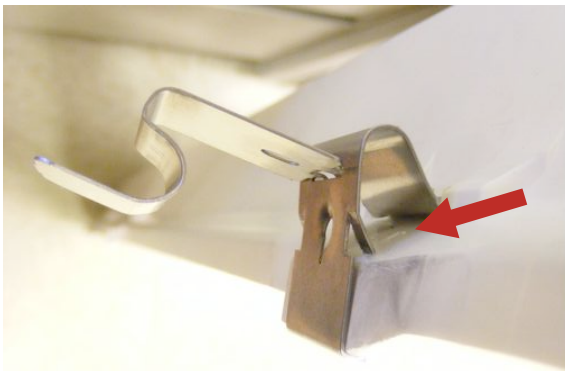

1400 S. Old Hwy 141 Fenton, MO 63026 Phone: 636.600.4084 Fax: 636.600.4108 Email: sales@slplighting.com

New Hardware!

The Citadel 4 has a new and improved latch! The new latch engages with the housing and provides positive support for the lens, without the potential to flex. Another feature on this new latch is its ability to lock tightly into place. Preventing the possibility of breaking loose and falling off.

○ Helps provide more support!

Installation!

Installing the new latch is also different. The latch hooks from the bottom of the housing and pops the dove tail into place. For more indepth instructions visit www.slplighting.com and click Technical Information on the Citadel 4 page.
